

*THE OFFICIAL MEME COIN OF THE BITCOIN BULL RUN*

Issuer of BTC Bull Token: BCBLL Limited, CO No 2162145, Quijano Chambers, P.O. Box 3482, Road Town, Tortola, British Virgin Islands

This crypto-asset whitepaper has not been approved by any competent authority in any Member State of the European Union. The offeror of the crypto-asset is solely responsible for the content of this whitepaper. This whitepaper was released on 07/02/25 and last updated on 14/05/25.

## ABSTRACT

Bitcoin (BTC) is the best-performing asset in history with an AAR of 230% – up more than 200 million percent since inception. BTC Bull Token is a meme token that represents the unstoppable force that will carry Bitcoin to \$1 million and beyond. It celebrates this once-in-a-lifetime opportunity as bullish momentum for cryptocurrency accelerates in 2025.

Created with the current and upcoming Bitcoin bull run in mind – featuring a combination of meme culture and serious market potential – BTC Bull Token is designed to rally the crypto community around Bitcoin's charge to new all-time highs. By leveraging the power of community and bullish sentiment, BTC Bull aims to provide a fun and engaging way to participate in Bitcoin's success.

BCBLL Limited and their directors at OTONOM LTC. confirm that, to the best of the knowledge of the management body, the information presented in this crypto-asset whitepaper is fair, clear, and not misleading and that this document makes no omission likely to affect its import.

The prospective holder should base any decision to purchase BTC Bull Token on the content of this crypto-asset whitepaper as a whole and not on the summary alone. The offer to the public of BTC Bull Token does not constitute an offer or solicitation to purchase financial instruments. Any such offer or solicitation can be made only by means of a prospectus or other offer documents pursuant to the applicable national law. This crypto-asset whitepaper does not constitute a prospectus as referred to in Regulation (EU) 2017/1129 of the European Parliament and of the Council or any other offer document pursuant to Union or national law.

# 1. INFORMATION ON THE PROJECT

## 1.1 The Challenge

Capturing Bitcoin's next major bull run can be challenging for meme coins and community projects seeking to align themselves with Bitcoin's potentially historic price movements. Projects often face:

- **Lack of Engagement:** Meme coins can fail to cultivate lasting communities or tangible reward mechanisms.
- **Market Uncertainty:** Regulatory, sentiment, and adoption factors can derail or slow bullish momentum.
- **Zero Visibility:** Standing out amidst numerous tokens requires a unique, resonant theme.

BTC Bull aims to overcome these obstacles by uniting community hype with verifiable rewards and an unshakable bullish narrative for the best global digital asset.

## 1.2 The Solution

BTC Bull was created with the belief that Bitcoin's price will surge to \$250,000 and beyond in the upcoming bull cycle. The core elements of BTC Bull's approach include:

### 1. Meme Culture & Market Potential

BTC Bull taps into meme-driven community excitement while simultaneously leveraging the serious possibility of Bitcoin's price skyrocketing.

### 2. Military-Strength Branding

Personified as a formidable bull in U.S. Army gear, BTC Bull's imagery signals unstoppable force and aggression against any threats (regulatory or otherwise) impeding BTC's march to \$1M.

### 3. Fun & Engaging

BTC Bull fosters a bullish mindset and celebrates every Bitcoin milestone, fueling community enthusiasm and long-term holder loyalty.

### 4. Rewards & Airdrops

BTC Bull actively rewards believers and community contributors with free BTC airdrops as BTC price milestones are crossed. Hodlers also benefit from token burns that enhance scarcity over time.

## 1.3 Project Overview

### Vision and Mission

The mission is to create a fun and engaging brand that aligns with the bullish sentiment surrounding Bitcoin, providing a community-driven meme coin that celebrates Bitcoin's journey to becoming the top investment asset in the world.

### What is BTC Bull?

BTC Bull Token is a meme coin built to champion Bitcoin's charge to \$250,000 and beyond. Essentially, it is the ultimate play for the next massive bull cycle that's coming for BTC, likely making \$BTCBULL one of the best projects to watch in 2025. The most bullish Bitcoin bulls are ready to enjoy the ride of a lifetime as we leave all historical opposition behind, gather millions of new supporters, and aim for the No.1 asset spot in the world above gold!

\$BTCBULL is a meme coin with a passionate community charged with championing the bull in all of us. What this means is, even \$150K BTC is FUD – you are not bullish enough. Here we grow the BTC Bull community, we rise as BTC rises, and we finally reap the rewards of the best asset class in the world.

And that's only the beginning. BTC Bull will reward the strongest \$BTCBULL holders with actual BTC airdrops as Bitcoin rises and ticks off various price milestones on its way to what many experts believe will be \$1 million.

### Why BTC Bull?

BTC Bull offers unique advantages:

- **Free Bitcoin Airdrops:** All \$BTCBULL token holders have the opportunity to receive BTC airdrops as the price of the greatest asset rises. Token holders simply need to download or import their current wallet to Best Wallet to be eligible to receive free BTC airdrops, and may need to meet social and trading engagement criteria to qualify.
- **The BTC Beta Play:** Bitcoin is going to \$250,000 and beyond in this bull cycle, guaranteed by the rules of mathematics, supply, and demand. With BTC Bull, you'll be holding the ultimate BTC-adjacent asset as the greatest bull run in history ramps up in 2025.
- **Token Burn Milestones:** BTC Bull aims to reward hodlers as the price of Bitcoin increases. Each time the price of BTC increases by another \$25K, a percentage of the \$BTCBULL token supply will be burned forever, creating upwards price pressure. We burn and we rise, and repeat!
- **10% Token Airdrop:** BTC Bull will airdrop 10% of the total \$BTCBULL token supply to early supporters when BTC hits a price of \$250,000. The amount of tokens received in the airdrop will be weighted according to the amount of tokens held, the amount of tokens purchased during the Community Sale, on-chain trading volume, and community engagement.

## 1.4 The Bitcoin Bull Run

### Historical Context of Bitcoin Bull Runs

Bitcoin has experienced significant bull runs throughout its history, each marked by substantial price increases driven by factors like market adoption, technological advancements, and macroeconomic trends.

- **2011 Bull Run:** Bitcoin's price rose from approximately \$1 in April 2011 to a peak of around \$32 in June 2011, representing a 3,200% increase.
- **2013 Bull Run:** Bitcoin started the year at around \$13 and reached a high of approximately \$1,100 by December 2013, marking an increase of over 8,300%.
- **2017 Bull Run:** Bitcoin's price surged from about \$1,000 at the beginning of the year to nearly \$20,000 in December 2017, a remarkable 1,900% increase.
- **2021 Bull Run:** Bitcoin's price rose from around \$7,000 in January 2020 to an all-time high of over \$64,000 in April 2021, an increase of more than 800%.

### Where We Are in the Current Cycle

During 2023 and 2024, Bitcoin came back from cycle lows around \$17,000 to a new all-time-high at approximately \$73,000, catalyzed by the introduction of Bitcoin ETFs and greater institutional interest. However, the market turned extremely bullish towards the end of 2024 when pro-crypto Donald Trump won the U.S. presidential election, setting a new all-time high at approximately \$109,000.

The whole atmosphere has changed. The anti-crypto career man Gary Gensler was forced out of his position as SEC chairman, ending Operation Chokepoint, which had been systematically strangling the industry. Trump has appointed pro-crypto people in several key positions in his new administration, clearing the way for positive crypto regulations and accelerated growth.

The market is now expecting new all-time highs to be made throughout 2025 and beyond on a price trajectory towards \$1M or more over the next 10 years – brought on by even larger institutional interest, the likelihood of the U.S. creating a Strategic Bitcoin Reserve and kicking off a 'new gold rush' for nation states, and increased mass adoption.

## How BTC Bull Capitalizes on the Next Bull Run

BTC Bull is strategically positioned to benefit from the anticipated Bitcoin bull run, offering early adopters a meme coin that is directly tied to the positive momentum of Bitcoin's market performance. As Bitcoin continues to rise, BTC Bull will implement token burn milestones and airdrops – including actual BTC – thus rewarding holders and creating scarcity that drives value. By aligning with Bitcoin's bullish trajectory, BTC Bull ensures that its community can maximize success during the next massive bull cycle.

- **Aligned Milestones:** BTC Bull triggers token burns and BTC airdrops at key BTC price increments (e.g., \$125k, \$150k, \$175k, \$200k, \$225k, \$250k).
- **Community-Driven Success:** As Bitcoin surges, so does meme coin momentum, ensuring that BTC Bull holders reap celebratory benefits beyond speculation alone.
- **Bullish Sentiment:** Continual positivity – no yield to negativity or FUD – reinforces community cohesion and brand identity as BTC marches forward.

## 1.5 Staking

BTC Bull Token is built on Ethereum, utilizing smart contract technology to allow staking. Participants can stake their tokens during the Community Sale (and beyond) to earn dynamic APY. This strategy incentivizes early commitment and supports ecosystem stability.

### How Staking Works

1. Stake Your Tokens: Once you purchase \$BTCBULL, you can lock them in a staking contract.
2. Earn Dynamic APY: The earlier and more significantly you stake, the higher the potential return. The APY adapts based on overall staked amounts and staking duration.
3. Benefit from Early Staking: Early participants enjoy higher APY, rewarding timely engagement and adding an extra element of strategy to BTC Bull.

### Benefits of Staking

- Passive Rewards: Earn additional \$BTCBULL without trading.
- Enhanced Earnings: Staking multipliers can boost overall returns.
- Security & Transparency: An Ethereum smart contract enforces fairness and reliability.
- Community Growth: Encourages long-term participation, strengthening the BTC Bull ecosystem.

## 1.6 Roadmap & Milestones

The BTC Bull brings glory and rewards to all believers. Along the inevitable path to a BTC price beyond \$1M, BTC Bull will burn token supply as the BTC price increases and airdrop BTC to the strongest hodlers! Plus, a huge \$BTCBULL airdrop at \$250K BTC!

### Phase 1: Community Building

Concept development and social media account creation, fostering a passionate Bitcoin believer community aligned with the ethos of BTC Bull.

### Phase 2: BTC Bull Token Distribution

Website build, token contract creation, staking contract development, security audits, and the start of the Community Sale. Staking pool contract enables the community to earn BTCBULL tokens prior to the token generation event.

### Phase 3: BTC Bull Token Launch

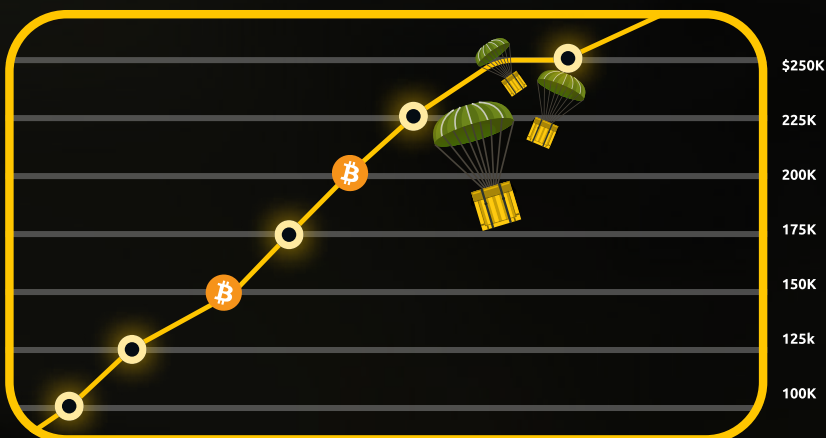

At the end of the Community Sale, the \$BTCBULL token will be listed on DEX. Staked tokens will be locked for 7 days after the end of the sale. Allocated marketing funds will be deployed as \$BTCBULL rides the Bitcoin (BTC) price appreciation wave.

### Milestone Events

- Token Burns at \$125K BTC, \$175K BTC, \$225K BTC.
- BTC Airdrops at \$150K BTC, \$200K BTC.
- \$BTCBULL Airdrop: 10% of the total token supply at \$250K BTC – weighted by tokens held, tokens purchased during the Community Sale, on-chain trading volume, and community engagement.

#### Project Milestones

- BTC \$100K - *Token Sale Starts!*
- BTC \$125K - *Token Burn!*
- BTC \$150K - *BTC Airdrop!*
- BTC \$175K - *Token Burn!*
- BTC \$200K - *BTC Airdrop!*
- BTC \$225K - *Token Burn!*
- 🪂 BTC \$250K - *\$BTCBULL Airdrop!*

## 1.7 Community

Bitcoiners are the smartest, most dedicated people in the world who all believe in the freedom and wealth generation BTC represents. Follow us on socials to join the community and celebrate the ascension of Bitcoin. Stay updated with project news and announcements, and engage with fellow supporters to amplify the excitement around BTC Bull.

- X/Twitter: [https://x.com/BTCBULL\\_TOKEN](https://x.com/BTCBULL_TOKEN)
- Telegram: [https://t.me/BTC\\_Bull\\_Token](https://t.me/BTC_Bull_Token)

## 1.8 Team

### Core Team:

A collection of Bitcoin enthusiasts, meme coin experts, and marketing professionals with a strong belief in BTC's long-term prospects.

### Development & Security:

Smart contracts are developed on Ethereum and audited for security with ongoing reviews to maintain safe, transparent staking and token distribution.

### Advisors:

Specialists in tokenomics, crypto regulation, and promotional strategies, ensuring BTC Bull remains robust and adaptive.

## 2. TOKEN ECONOMICS

BTC Bull has a total supply of 21 billion tokens, reflecting Bitcoin's 21 million supply cap. The distribution plan is as follows:

- **Bull Fund (15%)**  
Reserved for strategic development, ensuring BTC Bull can adapt to changing market conditions.
- **Token Burns (15%)**  
Allocated for permanent burns each time BTC crosses another \$25K milestone.
- **Staking Rewards (10%)**  
Distributed to those who stake and lock their tokens, with dynamic APY encouraging early participation.
- **Airdrops (10%)**  
Set aside to reward loyal holders with BTC airdrops when Bitcoin reaches certain price thresholds, and also a 10% \$BTCBULL supply airdrop at \$250K BTC.
- **Exchange Liquidity (10%)**  
Ensures stable trading activity on decentralized (and potentially centralized) exchanges.
- **Marketing Funds (40%)**  
Deployed for influencer partnerships, social media campaigns, and brand-building to sustain hype and adoption.

## 4. RISK DISCLAIMERS

BTC Bull Token is a meme coin and not a security in any way, shape or form. Investing in any cryptocurrency carries risk, particularly meme coins. This whitepaper is for informational purposes only and does not constitute investment advice. Prospective participants should consult their financial advisors before making decisions.

Cryptocurrency regulations vary significantly from one jurisdiction to another. The legal status of cryptocurrencies, tokens, ICOs, and other digital assets is still undefined or changing in many countries. It is your sole responsibility to determine if you are permitted by law to invest in BTC Bull Token and participate in the blockchain ecosystem based on your nationality, residency, and any other consideration.

The team behind BTC Bull Token does not guarantee any profits and shall not be liable for any loss of investments. Participants are only allowed to purchase \$BTCBULL with legal tender or other cryptocurrencies accepted by the BTC Bull Token team. All entities and individuals are forbidden from using \$BTCBULL for any illegal activity.

BTC Bull Token, the website, the \$BTCBULL token, and this whitepaper do not meet UK Crypto Regulations, thus making the project unsuitable for a UK audience. Anyone visiting the site or viewing the whitepaper from the UK should be aware of this restriction.

It is important that investors also understand the following MiCA-aligned risk points:

1. **Potential Loss of Value:** BTC Bull may lose its value in part or in full; there is no guaranteed token price.
2. **Illiquidity & Transferability:** The token may not always be easily tradable or transferable, depending on market conditions.
3. **No Guarantees:** Rewards are not tied to the \$BTCBULL token, and are dependent on the performance of BTC. Milestone airdrops are not investment returns, and are not guaranteed to all presale participants. Community members may be required meet certain social engagement and trading criteria in order to qualify for rewards.
4. **Volatility:** Meme coins can experience significant price swings due to speculative demand and sentiment shifts.
5. **Not Covered by Compensation Schemes:** BTC Bull is not covered under investor compensation or deposit guarantee schemes in the EU.
6. **Regulatory Changes:** The status of crypto-assets is subject to evolving laws. If local regulations forbid participation, you may be restricted from holding or trading the token.
7. **14-Day Withdrawal Right:** Retail holders ordinarily have 14 calendar days to withdraw from the agreement to purchase crypto-assets, if applicable under local regulations. Refund requests must be sent to [refundsupport@btcbulltoken.com](mailto:refundsupport@btcbulltoken.com). Additional information to validate the refund request will be required. Once \$BTCBULL is publicly launched on open markets, purchases are final.

The offer to the public of BTC Bull does not constitute an offer or solicitation to purchase financial instruments, and any such offer or solicitation can only be made by means of a prospectus pursuant to applicable national law. This crypto-asset whitepaper does not constitute a prospectus under Regulation (EU) 2017/1129 or any other EU legislation.
